INTRODUCTION TO SERVICES

Lizard Landscape Design and Ecology, based in Worthing, West Sussex, is an environmental consultancy specialising in the combined services of landscape planning, landscape design, ecological and arboricultural assessment.

The practice has been established for over 15 years, and our combined consultancy team brings together a wealth of experience and technical expertise. The practice continually seeks to provide positive, sustainable, and proportionate landscape solutions for a broad range of sectors at varying scales including:

- Development & Regeneration (Housing and Mixed Use)
- Energy & Infrastructure (Solar / Oil / Wind)
- Education & Leisure (Schools / Golf Courses)
- Heritage & Environment (National Parks)
- Green Space & Public Realm (Parks and Streets)

“...judgement on the susceptibility to the type of change or development proposed and the value attached to the landscape...”

SERVICES PROVIDED

Services are undertaken through reference to best practice guidance including: '*Guidelines for Landscape and Visual Impact Assessment*' Third Edition (2013) (GLVIA3). All Services include a proportionate level of stakeholder engagement. Scope of Services offered include:

- **Landscape Scale Studies** to guide land use and inform development planning, including Character Assessments of Landscape / Townscape / Seascape; Landscape Sensitivity / Capacity Studies and Green Infrastructure Strategies
- **Landscape and Visual Appraisal / Landscape Capacity Studies**, to inform suitability of land for development and provide a landscape led approach to achieving this
- **Landscape and Visual Impact Assessment (LVIA)**, from a short statement of opinion to a stand-alone report or a chapter within an Environmental Impact Assessment (EIA). In addition LVIA Audit can be undertaken to determine the relative appropriateness of any professional judgements made within an existing LVIA
- **Expert Witness Services**, where proposals require a proof of evidence and representation at a public inquiry
- **Environmental Impact Assessment (EIA) Coordination**, where there are likely to be significant environmental effects arising from a development. EIA Coordination more effectively manages environmental risk and enables integrated development of environmental design and mitigation proposals
- **Landscape Management Plan Services**, to achieve a landscape vision over time

“...taking into account the impacts extent, duration and potential for reversibility...”
