Landscape Design and Ecology

LANDSCAPE PLANNING SERVICES

Lizard can provide Whole Estate Plan (WEP) services for individual land owning organisations within the South Downs National Park (SDNP), which help to inform how estates can adapt and develop into the future for the landowner, the estate, the community and the National Park Authority.

The aim of the WEP is to both define an agreed baseline and to aid decision making through the identification of mutually acceptable and proactive solutions which both serve the wider purposes of the National Park and those of the estate.

Considerations include adaptation to the effects of climate change, rural business adaptation, pressure of development, changes to subsidies following Brexit, pressure from visitors and planning for succession.

The estate plan is designed to help guide and support funding bids, future neighbourhood plan production, agri-environment, forestry and clean water schemes amongst other environmental and social services.

For all enquiries or further information please contact: Josh Peacock - Associate Landscape Planner
